Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-13 are pending.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The processes of claims 1-13 do not provide reaction reagent(s) and/or conditions to carry out the claimed invention in each of the steps. The relationships between the starting material and the final product via the intermediate(s) are not adequately shown in the step(s) of the claimed processes.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kingston et al (US 5,470,866).

Kingston et al teaches a process of converting cephalomannine to a taxane intermediate; note compound 12 in Figure 5 and lines 40 to 65 column 5 of the patent. The prior art compound 12 is an analog of the current taxane intermediate which is hydroxy-protected at the C-7 position and the C-2' position. The amine moiety of the prior art taxane intermediate is then further acylated to form taxol(paclitaxel) as shown in Figure 5 or to form taxotere 27 in column 23 of

Art Unit: 1625

the patent; note lines 20 to 65 of column 23 and that taxotere is also named docetaxel. Thus, the claimed process in claims 1-3 would be deemed obvious over the prior art teachings in view of the analogy of the hydroxy-protecting groups in the same amine taxane derivatives.

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ba K. Trinh whose telephone number is (571) 272-0695. The examiner can normally be reached on M-F (8:30-5:00).
